

July 16, 2021

To President Joe Biden & Vice President Kamala Harris.

I hope this letter will reach your desk.

I'm writing this to get justice serve. I started out with public housing and nothing happened there and then I further my search were as I emailed all the ball players who took part in this rebuilding of the SFHA projects and no response! I even had a meeting set up with the developers and our district 10 Supervisor and that still didn't work. Before that I emailed our Mayor of San Francisco and she forwarded to one of her colleague and he passed it back to SFHA.

The city of San Francisco is going back to Genocide and the reason why I say that is because in the sixties and seventies we had high rises in our community which it was called the Geneva Towers; there was so much bad things that were going on where as the people protested to remove the Geneva towers and even John Steward who once oversees the Geneva towers. Now SFHA/ HUD is leasing there land to these different developers who signed and agree to HUD rules and regulations under the 964. The developers are not following the rules. I wrote a letter to San Francisco HUD division and there was no response. The person who I addressed to forwarded to the Mayors office and there was No resolution of the problem resolved. Mayor London Breed appointed a person to oversee SFHA and she doesn't know nothing about public housing she only visited Sunnydale one time and that was it she doesn't reach out to the residents and she not interested of knowing what the residents would like to have done in their community people supposed to help the community not harm.

These developers are changing everything without the residents input! There are doing what and how they want and that's it; that's not fair to the residents yes I agree a change is good but why the residents can't be a part of the change? Here in Sunnydale we do not have a service provider! All other public housing they have service providers.

I would like to revisit this plan of building residents houses here in our community. The developers are taking up 30.000 square feet to build what they wanted and imagined how many single units can be built here in our community. No one didn't vote for the city to dictate the residents living situation why build up and live in a small unit and not enough Ventilation to be able to breathe without worrying about catching the Covid-19.

In my closing: our community need help because at the end of the day John Steward will be the oversee all buildings that are being built here in San Francisco. There is no one on the residents side they're are trying to remove all Franciscan's out of San Francisco!

Shelly Leonard
